BLOOMINGTON, ILL.

INTRODUCTORY.

ENCOURAGED by the expressed appreciation of my friends and patrons for the Directory presented to you last year, I again offer GOULD'S DIRECTORY FOR 1874. I have expended no small amount of care and capital to make this, if possible, more complete and correct than any previous issue; my agents have been extra careful in procuring the information necessary, and I feel assured this Work will be found as free from mistakes as can be expected in a book of its kind. In this connection I return thanks to the citizens of Bloomington and Normal, for their uniform kindness toward my agents, and to my patrons will say that, although the receipts do not meet my expectations I am nevertheless grateful.

Many changes have taken place in this city since my last issue; several firms, that were then in business here, have gone and new ones are in their places, besides others who have located here and started new enterprises, among which may be mentioned the woolen mill in South Normal, Fenny & Bacon's brush factory, a chair factory and a paper mill, all of which prove the growing importance of the Evergreen City.

The reduction of the force in the C. & A. R. R. shops has caused a decrease in the number of mechanics, still we find no decrease in the population of Bloomington, on the contrary there is an undoubted increase of several hundred, there is also a marked increase in the number of business men, and those of capital who have made this their place of residence; the returns from Normal however, shows a decrease in the number of names taken.

Trusting that due allowance will be made for any mistakes that may have occurred, I remain

Yours Respectfully.

DAVID B. GOULD.

JOSIAH F. MELCHER, STAIR BUILDER!

411 N. East Street.

Having been engaged in Stair Building for a number of years, I am prepared to do all kinds of Stair Work, no matter how complicated. Will do Stair Building in any part of the State at Bloomington prices, and put up the work when freight, board and traveling expenses are paid. Will make rails for stairs complete, and warrant them to fit. All that is necessary is to send the number of risers, width of risers, and width of step on horse or pitch-board, diameter of cylinder at top of stairs, length of headway and return to wall. Also whether the rail is to be on the right hand or left hand of the stairs as you go up. Also whether the stairs are Geometrical, and how many steps [winders] there are inside the diameter line of cylinder, and how wide on pitch board, kind of rail, newel post and banisters.
